(54) Title: MODULAR DECK STRUCTURE

(57) Abstract: The modular deck structure has an open frame with interconnected crisscross framing members defining a plurality of polygonal cells (14). Each of the cells has a top, a bottom and an inner wall (20) delimiting an opening. The inner wall has a sloping portion (26) for draining water out of the open frame. The modular deck structure also has a plurality of flagstones (24) with side edges (23). Each of the flagstones is sized and shaped to adjustably fit within a respective one of the cells. The modular deck structure may also have conforming means for conforming the side edges of the flagstone to the sloping portion of the respective cells, thereby allowing each of the flagstones to sit properly on said sloping portion of the cell.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the International filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
